Marketing team wants you to write copy for them. Your talent and writing flair is being wasted in authoring user stories and PRDs 🙄

But wait, I am a Product Manager

You might be wondering - what's a PM doing here?

But here's why I might just fit 'write' in:

- Because linear career paths are boring (at least for me)
- I bring AI expertise - the good kind that simplifies, not replaces
- I bring data and storytelling together (the left brain and right brain handshake)
- I am deeply empathetic and love solving for people

Some add on flex
